

Raisely TSE Assessment

Part 1: Bug Investigation

Scenario: "A customer support team member has reported that users are experiencing issues with a web form. The form submission button becomes unresponsive after certain user interactions, and the styling breaks in specific browsers."

Expected behaviour

The image shows a simple web form. It consists of two adjacent text input fields. The first field is labeled 'Name' and the second is labeled 'Email'. To the right of these fields is a blue button with the text 'Submit' in white. The form is presented as a screenshot within a larger document.

Tasks:

1. Investigate and identify the root causes of:
 - Button unresponsiveness issue
 - Cross-browser styling inconsistencies
2. Document the debugging process
3. Fix the identified issues
4. Provide a summary of changes made

Part 2: Documentation

Tasks:

1. Create a write-up explaining:
 - Root causes of the identified issues
 - Step-by-step debugging process used
 - Solutions implemented and reasoning
 - Preventive measures for similar issues

Deliverables

1. Fixed code (can be submitted in a repo, codepen, or html file)

2. Write up the problem and solution. The team will use this to reply to the customer.
